

# Real World. Hands on.

When your teen driver attends a Street Survival<sup>®</sup> school, we teach them to control their car in unpredictable situations based on its handling limits. They master the application of driving physics using their car. They learn how to make good driving decisions and react more quickly. They become more aware and learn how to begin anticipating the actions of other drivers.

The Tire Rack Street Survival<sup>®</sup> school is designed to go beyond today's required driver's education minimums and give teens across the U.S. the tools and hands-on experience to become safer, smarter drivers. Schools are designed to give each student trained, qualified in-car driving instruction as well as classroom experience.

The Tire Rack Street Survival<sup>®</sup> teen safe driving program is open to drivers ages 15-21 and is presented by the SCCA Foundation and BMW CCA Foundation charitable organizations, in partnership with the Iowa Chapter BMW Car Club of America and Des Moines Valley Region Sports Car Club of America.

## Only \$125 per student

Registration fee includes classroom and in-car training, continental breakfast, and lunch.

Sunday, October 13, 8:30 am – 4:30 pm  
DMACC parking lot,  
2006 S. Ankeny Blvd, Ankeny, IA
